# AVF aka A. Verdier-Fourmond

## Aesthetic approach:

AVF aka A. Verdier-Fourmond's work virtualize the figurative reality through digital technic

Self-taught, AVF has explored drawing as soon as the age of 7 years.

The thirst to experiment and discovery helped progressing through charcoal, pastel, gouache, oil painting, and digital painting.

Composing the image as basis of the way she expresses the inner feelings.

Giving to see a spiritual Inner light with exploding colours.

The series on color and light: «Lights», «aerial Colors», «Inner Colors» return a sense of calm, they echo the series on «archetypes» and «collateral damage».

Undoubtedly ambivalence of our world that AVF translate in the ambivalence of her work.

The beauty of a nature that does not exist, enhanced by the colors, the composition, the light that radiates!

These things do not exist, they are out of the imagination of the artist whose art reflects a strong intensely personal emotion!
